

Vighnesh N Ganesh

Analyst, Goldman Sachs | Visiting Researcher, London Business School | Off-roading enthusiast
vighneshnganeshofficial@gmail.com | +91 8939575774 | [linkedin.com/in/vighnesh-ng/](https://www.linkedin.com/in/vighnesh-ng/)

EDUCATION

BITS Pilani, Pilani Campus • Jul 2019 – Jun 2023
B.E. Computer Science • Minor in Finance

CGPA: 8.2

KEY ACCOMPLISHMENTS

- **Authored a chapter in** Neue Dimensionen in Data Science • [Buy the Book](#)

PROFESSIONAL EXPERIENCE

Goldman Sachs, Analyst • Full time: Jul 2023 – Present & Summer Internship

- **Big Data:** Backfilled 13.5 million records from Goldman's s3 datastore to Mongo DB using **Hadoop**
- **Recurring ETL:** Developed an endpoint to ETL partner data using a scheduled FTP pull with Kafka fallback in Java
- Ideated & organized an event that recorded the highest participation in the all-India Goldman Sachs Hackathon

London Business School, Visiting Researcher: Quant Modelling • Aug 2022 – Jul 2023

- **Forecasting:** Modelled imbalance prices of British electricity market using weather & market factors in python
- **Published the new SOTA** autoregressive Neural Network built with TensorFlow on Jupyter notebook: [read](#)
- **Risk Modelling:** Forecasted upper & lower quantiles (1%, 5%, 95%, 99%) using a shared parameter model
 - Reduced the quantile forecast pinball loss by 95% while also achieving 1.5% lower point forecast RMSE
- **Reinforcement Learning:** Designed and created three Q-learning FCNN agents which can take long or short positions using market, environmental & state variables with live **VaR** calculation (**Sharpe Ratios:**0.29, 0.47 & 1.6)

Global Alpha Researcher, Trexquant Investment Ip • Oct 2022 – Nov 2022

- Worked as quantitative researcher to implement a trading signal based on auction day effect on US bonds
- Developed three alphas with IR > 0.7 on treasury bonds and commodity futures and productionized a signal
- Worked with the data refresh team to find additional factors to populate the internal data collection

University of Warwick, Data Science for Social Good Fellow • Jun - Aug 2021

[GitHub Link to open source Streamlit application](#)

- Worked with The Federal Ministry for Economic Affairs and Energy of Germany to forecast unemployment rates
- **Reduced MSE by 50%** from 0.3+ to 0.164 by breaking up forecasts county wise & modelling each using SARIMA
- **Built a GUI app** in python incorporating the ARIMA and other Machine learning models like VAR.

ACADEMIC PUBLICATIONS

- Forecasting Imbalance Price Densities with Statistical Methods and Neural Networks • [Read IEEE Article](#)
- Algorithmic Trading of Real-time Electricity with Machine Learning • Under Journal Review

PERSONAL PROJECTS

Image Domain Translation using GANs • Deep Learning

- Adapted NICE-GAN & CycleGAN to translate 3-channel images into 21-channel images to aid security solutions
- Designed a hybrid architecture with 100M+ parameters and trained it on gigabytes of data on remote Linux server

Correlating the Green Cover of a County to CO2 Emissions • Landsat Image Processing

- Inferred Correlations using NASA's OCO-2 satellite images for CO2 emissions & calculating the green cover from LANDSAT images using Deep Neural Networks

EXTRACURRICULARS

Off-roading • Trained on flat track racing, adventure/technical trails, focusing on motorcross circuit racing

Music • Performed at Guinness World Record concert "Stop Child Labor" & Trinity College Level 4 Percussionist
